Field Work / Project Report (A.Y. 2021-22)

Date : / / 202

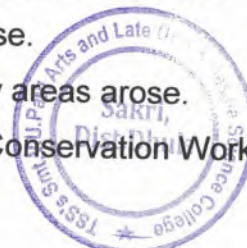

Title of Project	Seeds Collection
Place of Work	'Seed Bank', Smt. V.U.Patil Arts, & Late Dr. B.S.Desale Science College, Sakri Dist. Dhule (MS)
Number of Student Participated	210 (FYBA-62, FYBSC-131, SYBA-12, TYBA-05)

Amis and Objectives

- 1) Knowing the importance of environment.
- 2) To realize the primary step of forest ecosystem development.
- 3) Realizing the economic benefits of forests to humans.
- 4) Creating motivation for sustainable environment.
- 5) To bring to mind the information of the work of the students in the society.
- 6) Reminding not to throw seeds anywhere.
- 7) To create tendency for regular seed collection.
- 8) To create tendency to plant seeds on hilly barren areas

Outcomes

- 1) Realized the importance of environment.
- 2) Students showed positive attitude towards cultivation as primary step of forest ecosystem development. .
- 3) Realized the economic benefits of forests to humans.
- 4) Inspire about what sustainable environment is.
- 5) Took information about the work of students in the society.
- 6) Reminded not to throw seeds anywhere .and student showed positive attitude.
- 7) A trend of regular seed collection arose.
- 8) Tendency to sow seeds in barren hilly areas arose.
- 9) Paperless Sustainable Environment Conservation Worked.

A seed bank has been created for field studies in the field of environmental studies, which is compulsory in the first year of the academic year 2020-21 in Arts and Science, for the academic year 2021-

22. A policy on change was determined. During the academic year 2020-21, Bianchi, an alumnus of Dongar (Hill) Ecosystem College, Ramnagar, collected in the seed bank, and Ajay Nandre had invited nature lovers on social media to come and plant seeds every Sunday in the month of July. In this, grandmother and former students of the college, Ajay Nandre and all friends of environment lovers participated in this campaign.

Mr. Ramrao Sonu Nandre, an industrialist from Dombivli in Malpur village, used to come for a walk in this area every day during the Corona period when the process of sowing seeds was going on in the mountain. After seeing the process, he took detailed information from Prof. Ajay Nandre and congratulated and appreciated the entire team. Nandre Saheb expressed the opinion of doing tree plantation program along with seeding but the further process is not possible from our team considering the financial point of view. Because the trees planted on the mountains can only succeed if they get water, we expressed the opinion that it is impossible to deliver water here, so our work is going on with as much positive thinking as possible in the preliminary effort. There he expressed an opinion about completing the facilities you want for this honest work of environmental protection. He expressed his opinion about the financial cost estimate after a detailed review of the project that is required for this process and promised to spend the entire required amount. After initially discussing with our team, some members expressed their views that they wouldn't be able to provide such a huge financial support and they may have expressed this opinion only to boost their morale.

However, Prof. Ajay Nandre did not give up after studying the entire process and submitted the project report to him and suggested on Nandre Saheb's WhatsApp that the cost of the process would be five lakh rupees. He accepted it and asked for the rate sheet of the concerned organizations and sent the check to the appropriate shopkeeper and suggested to buy the necessary items from there. After giving this information to all the members, everyone was very happy. Information about this collaboration was also given on social media. Due to his financial support, Prof. Ajay Nandre constructed a pipeline on the mountain as well as drip irrigation on the mountain, prepared a separate well and installed an electric water motor and started the work of tree plantation. The whole process happened so fast that no one could believe it because not only did the water reach the top of the mountain but they also expressed their opinion of providing financial support from time to time for plantation. And due to their efforts, different types of work such as tree plantation, tree conservation, soil conservation, water conservation, bird and animal conservation started at the same time. After the information of this entire process reached the area, environment lovers not only from Malpur village but also from Sakri taluka and Dhule district started gathering. With the help of Shikshan India Pvt Ltd, the industry group, this work began to accelerate, the people of the village area started getting involved, grazing was banned, axes were banned, the support of Gram Panchayats, through the forest department started getting the support of many people.

The secretary of Trimurti Education Institute respected Dr. Mangalatai Desle, Principal Dr. P.S. Sonawane, all the professors of the college started getting cooperation. Not only this, Kaviyatri Bahinabai Choudhary North Maharashtra University Jalgaon also took notice of our work and appreciated the positive attitude of implementing the new concept of seed bank for environmental studies. After discussing with this team and expressing his opinion about cooperation through the department of National Service Scheme of the University for this environmental movement, Prof. Ajay Nandre asked him what kind of cooperation he wanted from the university level. He also expressed the opinion that this kind of help is necessary to approve as an adopted village for the National Service Scheme unit in the college and to prepare seed bids for various colleges and deliver them to us. The Director assured 100% acceptance of the expectations expressed by him and expressed his opinion to the Principal of the college to give the National Service Scheme unit in the college to Prof. Ajay Nandre for the academic year 2022-23. Briefly keeping in mind, the Corona disaster, we decided to implement the seed collection campaign as a paperless work.
