4.4.2 - There are established systems and procedures for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc.

Our institution has certain procedures and systems for maintaining and utilizing physical, academic, and support facilities. The maintenance of physical facilities of the college like classrooms, seminar hall, etc is done at the level of the office head. The maintenance of the laboratories and library is done at the college level. The laboratory is always cleaned and maintained by laboratory attendants. The academic and support facilities like sports, and cultural activities are maintained by various committees formed by the institution. The college campus is under CCTV surveillance at different important locations. The college has developed mechanisms for keeping the campus green and healthy. The College has a well-defined policy and system in place for the maintenance and utilization of all its physical and academic facilities.

Classroom management: Classroom being the most primary and important workspace, it is managed with proper systems and procedures as recommended by the Management and the University. Classroom cleaning and maintenance are done on a regular basis.

Laboratory: - As the college has science departments, the Laboratory policy forms the core of the working of the institution. General Instructions to students regarding safe and secure usage while in the laboratory are displayed in each lab.

Library for the overall smooth functioning.
